Summary

IT professional with over 10 years of experience in network infrastructure, systems administration, and technical support within MSP environments. Holds a degree in Computer Science and certifications in Linux (LPIC-1, LPIC-2, Linux Essentials) and Microsoft Azure Fundamentals. Experienced in deploying and maintaining network solutions, firewalls, and hybrid cloud environments (Microsoft 365/Azure AD), with a strong focus on troubleshooting, performance optimization, and reliable service delivery.

Core competencies

- **Network Engineering & Architecture:** TCP/IP, subnetting, VLAN design and segmentation, Layer 2/Layer 3 concepts, routing fundamentals, multi-site network design (offices, warehouses, retail environments)
- **Switching & Wireless:** Managed switches (Cisco, UniFi), VLAN configuration, trunking, STP basics, wireless deployments (Ubiquiti/UniFi), RF optimization, and coverage planning
- **Firewall & VPN:** Firewall configuration (SonicWall, Meraki), site-to-site VPN, remote access VPN, secure connectivity across geographically distributed environments
- **Network Services:** DNS, DHCP, IP addressing, network segmentation, performance tuning, and connectivity troubleshooting
- **Hybrid Infrastructure & Identity:** Active Directory (on-premises and hybrid), Azure AD (Entra ID), integration with network authentication and access control
- **Cloud & SaaS Integration:** Microsoft 365, Exchange Online, Google Workspace, hybrid identity, and service integration across cloud platforms
- **Network Operations (MSP):** Multi-client environment support, network deployment and standardization, proactive monitoring (RMM), incident response, SLA-driven operations
- **Endpoint & Infrastructure Support:** Network-aware troubleshooting across endpoints, device provisioning, integration with Intune and Apple MDM environments

Experience

BROAD PC Inc, IT Support Specialist

Feb '26 - Current

- Deliver on-site and remote IT support across multiple client environments, including corporate offices, warehouses, and retail locations.
- Deploy and maintain network infrastructure, including managed switches, firewalls, VLANs, and UniFi wireless solutions.
- Configure and support VPN connections (site-to-site and remote access) for geographically distributed businesses (e.g., LA, NY, Miami).
- Administer hybrid environments, including Active Directory (on-prem/AWS/Azure) and Azure AD (Entra ID).
- Support and manage Microsoft 365, Google Workspace, and Intermedia environments, including user provisioning and access control.
- Implement and support MDM solutions (Microsoft Intune and Apple device management) for mixed Windows/macOS environments.
- Perform advanced troubleshooting of network, endpoint, and connectivity issues to ensure minimal downtime.
- Install and configure IT infrastructure, including workstations, printers, firewalls, switches, and access points.

PC Tech Solutions LLC, IT Assistant

Oct '25 - Freelancing

- Provided technical support for residential and small business environments, including hardware repair, OS installation, and network troubleshooting.
- Performed server upgrades (memory/storage) and replacement of faulty components.
- Configured switches, VLANs, access points, and networked payment systems.
- Delivered end-to-end troubleshooting across hardware, software, and connectivity issues

UNESP, IT Analyst I, Network Administrator

Aug '23 - Aug '25

- Administered and monitored enterprise network environments, including managed switches and network infrastructure.
- Designed and implemented LAN and VLAN architectures, improving network segmentation and performance.
- Managed user accounts, permissions, and services across Windows and Linux environments.
- Deployed and maintained systems, including backup solutions, network services, and security controls.
- Provided technical support for internal teams and end users.

Piracicaba City Hall, Information Technician Support

Nov '12 - Aug '23

- Delivered technical support and maintenance for hardware, software, and network environments.
- Installed and configured local networks, printers, and operating systems.
- Managed OS deployment using imaging tools (Clonezilla).
- Supported specialized accessibility tools (Braille printers, screen readers).
- Maintained backup routines and ensured data integrity and security.

São Paulo State Police, Computer/User Support | Intranet Developer

Feb '08 - Feb '11

- Provided IT support for critical environments, including emergency dispatch systems (equivalent to 911).
- Installed and maintained network infrastructure, operating systems, and databases (SQL Server, MySQL, Firebird).
- Developed internal web applications (HTML, CSS, JavaScript, PHP) to improve help desk workflows.

Education

Anhanguera College (Brazil)

Bachelor's in Computer Science

Certifications

- Microsoft Certified: Azure Fundamentals
- Linux Essentials
- LPIC-1 System Administrator
- LPIC-2 Linux Engineer

Volunteer Experience

Los Angeles Homeless Services Authority (LAHSA)

Jan '26

- Supported large-scale field data collection for a government-led initiative, ensuring accuracy and coordination across distributed teams.
